We love to pair with... Artichoke Dip & Sweet Pea Hummus

Volcanic soils can be found all around the world and are rich in minerals like potassium, magnesium, and phosphorus, which can impart distinct flavors and textures to the grapes. These wines are known for their pronounced minerality, vibrant acidity, and complex aromas, which can range from flint to smoke to ash, often reflecting their unique terroir. The soil itself tends to provide great drainage allowing the vines to focus its attention on concentrated flavors and aromas!

ANCIENT VINES \$23.5

We love to pair with... Caramelized Onion Danish & Harbison Cheese

Wines crafted from old vines are often referred to as "vieilles vignes" in French, possess a unique charm and can reflect a vineyard's history. Vines can be anywhere from 30-120+ years old since there is no defined age for constituting "old". As a vine ages, their yields decrease, which in turn creates more concentration in flavors and aromas for the bunches that are still able to reproduce, therefore producing wines with greater depth, complexity and texture.

2016 1MN' Scholium Project Cinsault | Lodi, California

2019 Clos Siguier Les Camille Malbec | Cahors, France

2019 Rodano Chianti Classico | Chianti, Italy

Portugal's wine heritage dates back centuries and is home to 250 indigenous grape varieties, the most per square kilometer than any other country in the world.
